2002 Kentucky Annual Long-Term Care Report

INTRODUCTION

The Health Policy Development Branch of the Division of Epidemiology and Health Planning announces the release of the 2002 Kentucky Annual Long-Term Care Report. This branch is responsible for the utilization data collection and reporting required by 902 KAR 20:008 (rev. 2-16-01) and in support of the State Health Plan 902 KAR 17:041.

This report covers the period from January 1, 2002 to December 31, 2002. A completed survey, or correspondence from facilities closed during the reporting period, was received from all 428 Long Term Care (LTC) facilities licensed by the Office of Inspector General, Division of Licensure and Regulation. Eight LTC facilities were closed in 2002; therefore, no reports were received from these facilities.

The 2002 overall occupancy rate for nursing facility beds is 91.14%. This continued the trend that began in 1995, with the exception of 1999, of decreasing annual occupancy in the Nursing Facilities. The highest occupancy rate was 95.00% for the survey year 1995.

The ending census or the number of NF beds occupied December 31, 2002, was 23,411 compared to 23,301 occupied beds on December 31, 2001. These beds provided 8,520,237 patient days of care in 2002 compared to 8,556,764 in 2001.

***Special Note:** The 2002 Payor Source, Section 2, for total patient days as reported by the facilities shows a distribution different from the previous year. The total number of reimbursed days by primary payor source for nursing facilities is 64,241 days or (.8%) less than 2001. Medicare paid days increased by 59,702 (6.4%) from the 2001 report and Medicaid paid days were 171,644 (2.8%) less in 2002 than the previous report year. The most noticeable changes occurred in the State Supplemental Insurance (SSI), which decreased by (52.2%), and the decrease of (49.8%) in the "Other " category. These changes most likely occurred because of (1) clarification of the definitions for those categories and (2) the increased scrutiny of DPH in the quality of these data collected.

**** Note:** This report includes two new sections: Section IV, "Deaths in Long Term Care by Age Census" and "NF by County". The death census section was included in the report to indicate the age of the LTC resident at the time of death. The data shows that approximately 50% of the deaths in NFs are in the "Over 85" age group as would be expected.

Section V is "NF by County" is now Section V and includes Kentucky Nursing Facilities in alphabetical order by county. This report has been added to support Certificate of Need review regarding Nursing Facility Beds needs.

The rest of the Report Sections are organized by Area Development Districts (ADDs) and by the counties in those ADDs.

The definitions of terms in this report are:

Long-Term Care:

A facility licensed by the state through the Division of Licensing and Regulation providing one or more of the following levels of care:

Nursing Facility (NF) - Long-term care facilities, formerly skilled nursing, nursing home, or intermediate care facilities prior to October 1, 1990, which meet the Omnibus Budget Reconciliation Act of 1987 (OBRA 87) nursing home reform requirements. Nursing facilities must be certified to participate in the **Medicare program in order to be certified for participation in Medicaid**, with the exception of those who have obtained a Medicaid nursing requirement waiver.

Skilled Nursing (SN) - Establishments with medical staffs and permanent facilities that include inpatient beds, and with medical services, including physician services and continuous nursing services; that provide treatment for patients who require inpatient care but are not in an acute phase of illness and who currently require primarily convalescent or restorative services, and who have a variety of medical conditions.

Nursing Home (NH) - Establishments with permanent facilities that include inpatient beds, and with medical services including continuous nursing service; that provide treatment for patients who require inpatient care but do not currently require continuous hospital services.

Intermediate Care (IC) - Establishments with permanent facilities and health related services for patients who do not require the degree of care and treatment which a hospital or skilled nursing facility is designed to provide, but

who, because of their mental or physical condition, require care and services (above the level of room and board) which can be made available to them only through institutional facilities on an inpatient basis.

Alzheimer's Facility (ALZ) - A long-term care facility constructed and operated pursuant to KRS.216B.071 that provides care to residents with a primary diagnosis of Alzheimer's disease or related disorders.

Intermediate Care Facility for the Mentally Retarded (ICF/MR) - A facility licensed by the state through the Division of Licensing and Regulation to provide care for the mentally retarded and developmentally disabled.

Total Patient Days:

The total days of patient care provided by the facility for the year based on its capacity. It is calculated by summing the daily patient census for each day in the reporting period.

Days in Period:

2002 had 365 days.

Licensed Beds: The number and type of beds for which the facility has been licensed at the end of the reporting period.

Percent Occupancy:

Total days divided by potential patient days.

Potential Patient Days:

Number of licensed beds x the number of days in the reporting period (adjusted to reflect changes in licensed beds during the reporting period. Example: 100 licensed beds X 365 (days in 2002) equals 36,500 potential days.

This figure is not shown in the report but used to calculate occupancy percentages.

Reporting Period:

January 1, 2002 to December 31, 2002

Nursing Facility Special Note: If a facility converted Skilled Nursing (SN), Nursing Home (NH), or Intermediate Care (IC) beds to NF beds during this reporting period, all resident activity in these beds was considered to be NF for the entire period regardless of the date of the change.

This report now becomes the most recent official data on Long Term Care services utilization published by the Cabinet for Health Services. Data Analysis - Occupancy Rates

The following table and graphs present statistics from the Kentucky Annual Long-Term Care Reports from 1995 to 2002. In the published reports for 1996 and 1997, the data was reported in Medicaid Managed Care Partnership Regions (MCPR) rather than in Area Development Districts (ADDs). The survey data were recalculated using the ADDs so that a linear comparison could be made. A map of the ADDs is included at the end of this section.

LTC facilities continue to be an important segment of the continuum of care in Kentucky. Hospital discharge for 2002 shows a total of 369,626 patients age 44 and older were discharged from Kentucky Acute Care hospitals for all DRGs. Of the 211,954 females discharged, 30,545 or 14% were discharged to a skilled or intermediate care facility. Males discharged to skilled or intermediate care facilities remained at 9% of total male hospital discharges with 157,688 males discharged from acute care hospitals and 14,566 of these discharges placed in skilled or intermediate care facilities.

The occupancy rate for licensed Nursing Facility beds has decreased over the past eight years by 3.86% from 95% in 1995 to 91.14% in 2002. The following chart shows the decrease in occupancy for the last eight years. The decline has been continuous from 1995 through 1998 with a very small increase in 1999 (.05%), which is likely not statistically significant. The occupancy rate declined from negative 3.2% to negative 3.9%. The following table shows data for each year by ADD. From 1995 to 2002, occupancy fell in all but one of the fifteen Adds. An attached chart shows a graphical interpretation of the data. In 2002, there were 26, 227 licensed NF beds, an increase of 448 beds. The increase in NF beds is likely due to two Veterans Nursing Facility opening in 2002 and another facility reopening in a new building.

The occupancy rates for Personal Care beds have dropped from a .08% increase in 1995 -2000 to a negative .11% in the 1995-2002 eight year time period. The highest occupancy rate for Kentucky Personal Care beds was 85.94% in 1997 and the lowest is the 2002 survey year with 75.17%.

The number of licensed Nursing Home (NH) beds in the current survey year is 451 beds, 85 less than the 536 NH beds licensed in 2001. Occupancy rates were down from 89.56% in 2001 to 88.96% in 2002 with nearly 20,000 fewer patient days reported.

Further data on the occupancy rates by bed type are presented on the following charts and table.

2002 KENTUCKY ANNUAL LONG-TERM CARE SERVICES REPORT

SECTION VII - PATIENT ORIGIN DATA

Patient Origin Data

In January 2002, a self-reporting survey was sent to each licensed Kentucky Nursing Facility (NF) in order to determine the patient origin. A 100% response to the survey was obtained from the nursing facilities.

Patient origin definition: The county where the resident was living at the time of admission to the facility. This does not include hospital discharges to NFs.

This survey pertained only to residents in the facility on December 31, 2002.

The survey requested that each facility report the total admission by county of origin or if from the bordering states TN, OH, MO, IN, IL, WV and VA, report state only. All other states and unknown resident origin were reported as Unknown.

The following chart is organized by ADD, Facility Name, Facility County and County of resident origin. ADD totals are at the top of the column followed by facility total and the number of residents by county.

The Patient Origin survey totals may not equal either the ADD or Facility totals in the preceding sections of the 2002 LTC Survey because of the reporting timeframes and the method of collection.

This data is used to support the State Health Plan Long Term Care methodology and Certificate of Need decisions.
